AGENTIC 3D · OCTOBER 16, 2026 · AI-GENERATED NARRATION

# Pilot Where Mistakes Are Easy to Undo

For technical product managers and engineering leaders

# The cost of a mistake rises at each step

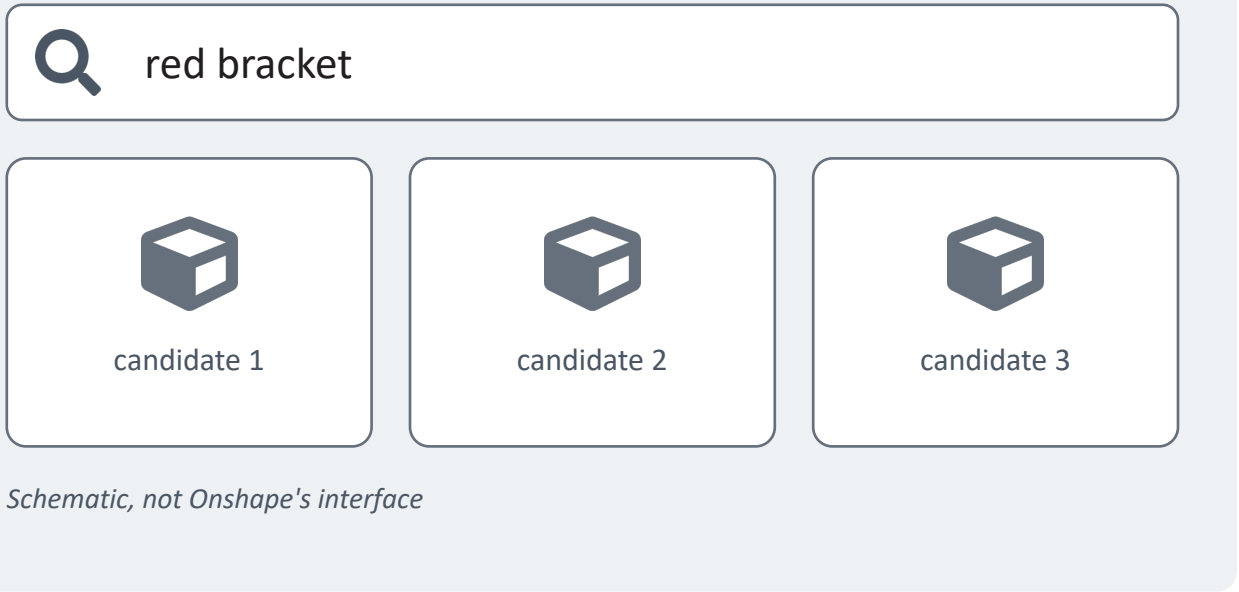

Evidence labels: REPORTED FACT · SOURCE CLAIM · EDITORIAL INFERENCE · UNVERIFIED · TRANSCRIPT · NOT ESTABLISHED

Source: Editorial interpretation based on Onshape (Oct. 5), NVIDIA (Oct. 8) and Engineering.com reporting on Autodesk (Sept. 22), 2026

# Start with discovery

SOURCE CLAIM

Onshape says: an opt-in Onshape Labs feature, released for public documents only

*Schematic, not Onshape's interface*

**Observed check:** retrieve public-document candidates from their thumbnails

NOT CHECKED

- Dimensions
- Material
- Tolerances
- Revision state

*A retrieved bracket may look right without being right.*

Source: Onshape, “Introducing AI Descriptive Image Search from Onshape Labs,” Oct. 5, 2026

# Simulation preparation: stronger checks

SOURCE CLAIM NVIDIA's walkthrough for preparing a robot asset for simulation

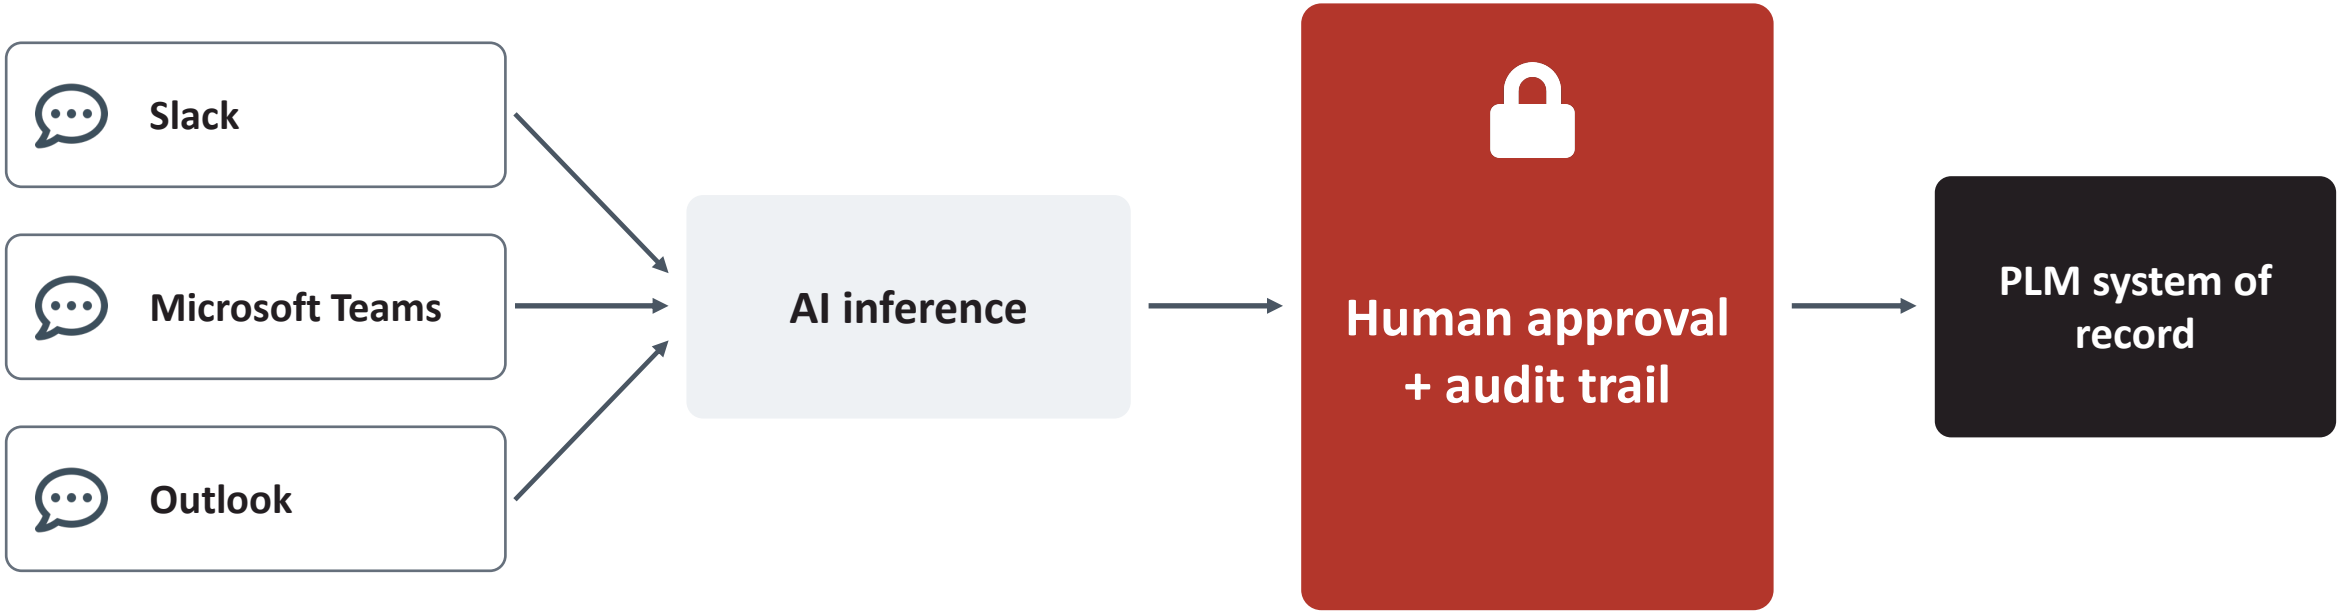

**Checked: readiness for the demonstrated simulated workflow**

**Not shown: that a real robot will perform reliably in a physical environment**

Source: NVIDIA, “5 Steps to Create SimReady Assets for Robotics with Frontier AI Models,” Oct. 8, 2026 (00:20–00:50)

# Writing to PLM raises the stakes

SOURCE CLAIM Autodesk's Jeff Kinder: planned, expected “in the next couple of quarters.” Not deployed.

**Must be correct and auditable:** extraction · attribution · revision context · approval context · entry into PLM

Source: Engineering.com, “Autodesk's AI push is actually a pull,” Sept. 22, 2026

# Sequence adoption by consequence

| Workflow | Observed check (per source) | If it is wrong | Required control |
|---|---|---|---|
| **Discovery** | Retrieval from thumbnails; public documents only (Onshape) | A person inspects the candidate before acting | Human inspection |
| **Simulation preparation** | Scale, parts, appearance checks; rerun checks and grasp test, in simulation (NVIDIA) | Traceable if the evidence is kept | Keep references, asset changes, check results, simulation conditions |
| **Writing to PLM** | None disclosed; capability is planned (Autodesk) | Inferred information becomes part of the official record | **Auditable approval required** |

EDITORIAL INFERENCE

Ordered by reversibility and consequence, from what each workflow says it does. Not a claim that any system is more accurate.

Source: Inference from Onshape, Oct. 5, 2026; NVIDIA, Oct. 8, 2026; Engineering.com, Sept. 22, 2026

# Watch for physical-task evidence

SIMULATION

## Grasp test in Isaac Sim

SOURCE CLAIM

Part of NVIDIA's simulation-preparation workflow

**Checked in simulation, not physical deployment**

PHYSICAL

## Replicated real-robot tasks

UNVERIFIED · TRANSCRIPT

Podcast report: most cited world-action-model results came from simulation benchmarks; the real-robot result covered one task.

**Secondary report from an automatic transcript: check against the audio and underlying paper.**

EDITORIAL INFERENCE Physical-task replication is a more consequential watch item than another simulation-only demonstration.

Source: NVIDIA, Oct. 8, 2026; Physical AI Podcast, “Atlas Loses Its Pinky, Only One Humanoid in Eight Walks,” Oct. 3, 2026 (07:28–07:35)

# Pilot, retain, approve, watch

EDITORIAL INFERENCE

1 **Pilot retrieval**

A narrow retrieval pilot, with human inspection

2 **Retain simulation evidence**

References, asset changes, check results, simulation conditions

3 **Approve PLM writes**

Approval before inferred content becomes a record

4 **Watch deployment and physical replication**

Published deployment evidence, review controls, physical-task results beyond simulation

SOURCE CLAIM

SEPARATE FROM CAPABILITY EVIDENCE

## World Labs–AMD

World Labs says it has signed a definitive agreement to join AMD, subject to regulatory approvals and customary closing conditions.

**A proposed transaction, not evidence of what the technology can do.**

Source: World Labs, “World Labs is Joining AMD,” Sept. 28, 2026; recommendations are editorial
